WIHS MEDICAL RECORD ABSTRACTION FORM — FORM M9
HERPES SIMPLEX VIRUS (HSV) AIDS DEFINING — FORM VERSION 04/15/96

RECORD NUMBER: |__|__|__|__|__|__|__|

WIHS ID NUMBER: |__| - |__|__| - |__|__|__|__|__| -|__|

SEQUENCE

FORM # ____ OF _____

DATE OF HOSPITAL ADMISSION OR OFFICE VISIT:

____ ____/____ ____/____ ____
M D Y

ABSTRACTOR'S INITIALS:

|____|____|____|

A1. Date of abstraction ____ ____/____ ____/____ ____
M D Y

A2. Abstracting for: (CIRCLE ONE CODE)

HSV mucocutaneous lesions .....1 **(B1)**
HSV lesion of esophagus or lungs.....2 **(B2)**

PROMPT: IF B3=1 (i.e., CULTURE PERFORMED), COMPLETE FORM CA5
IF C1=1 (i.e., TZANCK PREP PERFORMED), COMPLETE FORM CA4

SECTION B: DEFINITIVE DIAGNOSIS	YES	NO
B1. Suspected HSV mucocutaneous lesion(s) noted on exam (by visual inspection, anoscope or speculum) **lasting for greater than one month by history**?.....	1 **(B3)**	2 **(END)**
B2. Suspected HSV lesion of esophagus or lungs noted by medical provider and/or identified by endoscopy or bronchoscopy (results recorded on CA3).....	1	2 **(C2)**
B3. Was HSV documented by culture of the lesion (Were positive HSV culture results recorded on Form CA5)?	1 **(END)**	2
B4. HSV antigen (Ag) detection by immunoassay or DFA antibody stain of lesion? ..	1 **(END)**	2 **(C1)**

SECTION C: PROBABLE DIAGNOSIS

C1. Positive Tzanck prep taken from edge of probable HSV lesion (Giemsa or methylene blue stain reveals multinucleated giant cells)?	1 **(END)**	2 **(PROMPT)**

PROMPT: END AFTER C1 IF ABSTRACTING FOR A MUCOCUTANEOUS LESION

C2. Persistent dysphagia (difficult swallowing) and/or odynophagia (painful swallowing) documented?.....	1	2 **(END)**
C3. Administration of oral or intravenous anti-fungal medications (Ketoconzole, Fluconazole, Amphotericin) documented?	1	2 **(C4)**
C3a. NON-response (persistence of signs/symptoms) documented?.....	1	2 **(END)**
C4. Trial of acyclovir (Zovirax) documented?	1	2 **(END)**
C4a. **Response** (improvement of signs/symptoms) documented?	1	2 **(END)**
