

WOMEN'S INTERAGENCY HIV STUDY
QUESTION BY QUESTION SPECIFICATIONS
FORM BX: INTERIM BIOPSY REPORT FORM

General Instructions:

1. The Interim Biopsy Report Form will not be administered at the core visit, as the information to be collected on it is already part of the F22HX form. Instead it will be administered during interim contact between core visits, either via **site-initiated interim contact** (e.g., phone call from site to participant) or **participant-initiated interim contact** (e.g., phone call from participant to site).
2. All dates should be recorded in the MM/DD/YY format unless otherwise noted. For dates that must be completed on the form, if the participant cannot remember the exact month (and day), probe for the season. Use "15" for the day if the specific day cannot be recorded. Probe for the season and assign the month as follows:

Summer	=	July	=	07
Fall	=	October	=	10
Winter	=	January	=	01
Spring	=	April	=	04

Interviewers should have available an appropriate calendar to aid the participant in determining dates. Years in response to questions inquiring about occurrences "since last visit" should be 1995 and thereafter.

3. For questions containing an open-ended specify box linked to the response "other," interviewers should print responses exactly in the words of the respondent.

SECTION A: GENERAL INFORMATION

- A6. If form is being administered as part of **site-initiated interim contact**, circle "1" and read *Introduction #1* to participant. If form is being administered during **participant-initiated interim contact**, circle "2" and read *Introduction #2* to participant.

After reading the appropriate introduction, proceed to Question B1.

SECTION B: BIOPSY INFORMATION

- B1. Ask the participant the number of biopsies she has had since her last contact with WIHS staff. Only biopsies since the prior core visit that have not been previously reported to WIHS staff should be included.
- B2. Record the location of any biopsies reported by the participant by circling "1" or "2" for each potential location listed in subquestions a through h. For each biopsy reported by the participant, record the date of the biopsy in Question B2i.

The number reported in Question B1 should be equal to the number of "yes" responses in Question B2.

PROMPT: IF THE PARTICIPANT RESPONDED "YES" TO ANY OF QUESTIONS B2a-h, COMPLETE AN ATC FORM FOR EVERY REPORTED BIOPSY AND OBTAIN MEDICAL RECORD RELEASE.
