

**WOMEN'S INTERAGENCY HIV STUDY  
QUESTION BY QUESTION SPECIFICATIONS  
CONS FORM: CONSENT TRACKING**

This form will be used to document participant consent status for genetics studies, B-cell immortalization, commercial use of immortalized B-cell lines, GWAS, submission of GWAS data to dbGaP, and geocoding. Most consents were documented prior to the first use of this form at visit 28 and transferred into the WIHS data entry system for visit 28. Therefore, sites only need to complete this form in the following circumstances: (1) if it is a baseline visit and consent status has not been previously recorded; (2) if a participant has never been asked for her consent (e.g., due to missed visits) and returns to a WIHS visit; or (3) if a participant changes her mind about her consent. Entering this data into Apollo will enable sites to track consent status and obtain any missing consents as documented by the Visit Control Sheet or Apollo reports.
