

Medication History (F22MED)
Version 04/01/16

1. Question B2: Add new drug code for Genvoya (EVG + COBI + FTC + TAF): 290.
2. Add Question D1: "Now I'm going to ask about any medications you may have taken for Hepatitis B or C. Since your (MONTH) study visit, have you taken any medications to treat Hepatitis B or C?" Only if response is "yes" will list of medications be read to participant. If response is "no," interviewer will skip to Question SECTION E.
3. Reformat Question D1a to list all Hepatitis B and C medications.
4. Question D1: Add new drug code for Zepatier (elbasvir + grazoprevir): 723.
5. Delete old Question D1b: Indicator of whether or not participant has taken any Hepatitis medications since last visit. Question is no longer needed as a "no" response to Question D1 will cause participant to skip over the remainder of Section D.
6. Add new Question D1b: Indicator of whether each medication taken was taken for Hepatitis B, Hepatitis C, both Hepatitis B and C, or if participant is unsure whether medication taken was for Hepatitis B or C.
