

Drug Form 1 – visit 23
Version 10/01/05

1. Beginning with visit 23, Drug Form 1 will be completed only for antiretroviral medications the participant reports she is **currently** taking. If on the Antiretroviral Dosage Form she indicates that she has taken “drug X” since her (MONTH) study visit, but is no longer taking it, a Drug Form 1 **should not** be completed. Instructions at the top of Drug Form 1 have been rewritten to reflect this change.
2. Update name for tipranavir: “Aptivus (tipranavir).”
3. Question 1a: Change wording to indicate that question refers only to medications the participant is currently taking.
4. Delete question 4a: “Are you currently taking (DRUG)?” Form will now only be completed for medications participant is currently taking.
5. Delete question 4b: “Since your (MONTH) study visit, in what month and year did you most recently take (DRUG)?” Form will now only be completed for medications participant is currently taking. Stop dates for former medications will be collected on the Antiretroviral Dosage Form.
6. Delete question 4c: “What is the main reason you stopped taking (DRUG)?” Form will now only be completed for medications participant is currently taking. Reasons for stopping/changing medications will be collected on F22med on a per regimen (vs. per drug) basis.
7. Delete question 5a: “According to your doctor, how many times a day are you supposed to take (DRUG)?” Dosing information will now be collected on the Antiretroviral Dosage Form.
8. Delete question 5b: “In what dosage form do you take (DRUG)?” Dosing information will now be collected on the Antiretroviral Dosage Form.
9. Delete question 5c: “How many total (PILLS/PACKS/...) are you supposed to take each day?” Dosing information will now be collected on the Antiretroviral Dosage Form.
10. Delete question 6a: “How many times a day did you take this medication as prescribed?”
11. Delete question 6b: “How many total (PILLS/PACKS/...) did you take each day?”
12. Delete old question 7: “In the past three days, did you take more, less, or about the same amount of (DRUG) as you usually do?”
13. Add new question 7: “Please indicate on the response card the point showing your best guess about how much (DRUG) you have taken in the past three days.”
14. Replace old question 8 with new version. Change from “How many doses of (DRUG) have you missed in the last 2 weeks?” to “Please indicate on the response card the point showing your best guess about how much (DRUG) you have taken in the past 2 weeks.” By formatting question 8 similarly to questions 7 and 9, participant accuracy should be increased. In addition, comparisons between these three questions during analysis will be easier.
