

**DRUG FORM 1 – visit 24**  
**Version 10/01/05a**

1. Beginning with visit 24, Drug Form 1 will be completed only for antiretroviral medications the participant reports having taken *in the past three days*. If on the Antiretroviral Dosage Form (DSG) she indicates she has taken “drug x” since her (MONTH) study visit, but has not taken it in the past three days, a Drug Form 1 *should not* be completed. Instructions at the top of Drug Form 1 have been rewritten to reflect this change.
2. Add prompt before Question 1 to define “in the past three days”
3. Question 1a: Changed wording from *currently taking* to *taken in the past three days*.
