

**Drug Form 1 – Antiretroviral Medication Use (DRUG1)**  
**Version: Forms 10/01/05e; QxQs 10/01/05d**

1. Reword introduction to Question 11 to facilitate responses by participants. The new introduction uses concrete examples to help participant relate the terminology of “normal time” to her own use of medication. (New text is in italics below.)

The following question asks about the timing of your doses of (DRUG). *If you normally take (DRUG) once per day at 8:00 am, then 8:00 am would be your “normal time” for (DRUG). If you normally take (DRUG) once per day at 7:00 pm, then 7:00 pm would be your “normal time for (DRUG). If you normally take (DRUG) twice per day, for example at 9:00 am and 9:00 pm, then 9:00 am and 9:00 pm would be your “normal times” for (DRUG).*

*Do you have any questions?*

***IF YES, READ THE FOLLOWING:*** *OK, do you take (DRUG) at the same time each day? At what time(s) do you usually take (DRUG)? Over the past month, how often did you take (DRUG) within two hours of (TIME(s) GIVEN BY PARTICIPANT) in the past month?*

***IF NO, READ THE FOLLOWING:*** Please indicate on the response card the point showing your best guess about how often you took (DRUG) within two hours of your normal time in the past month.
