

Antiretroviral Medication Use (DRUG1)
Version: 10/01/11

1. Add newly FDA-approved ART Complera, a combination of emtricitabine, rilpivirine, and tenofovir.
2. Delete Question 3: “*SLV how long have you used DRUG?*”
3. Revise INTRODUCTION to Question 7: Remove sentence “*Most people with HIV have many pills to take at different times during the day.*”
4. Revise Question 9: Delete sentence “*We would be surprised if this was 100% for most people.*”
5. Delete Question 11 regarding *timing of ARV doses.*
