

Physical Examination (F07)
Version: 10/01/11

1. Add new Question A11: *“Does participant have folds of abdominal fat (pannus) that interfere with the ability to accurately measure the hip circumference?”*
2. Add new prompt before Question A12: *“For A12, measure the hip circumference including pannus.”*
3. Add new Questions A12, A12a: *“HIP w/pannus.”* For those participants who have a pannus, the hip circumference measure including the pannus should be entered in these questions.
4. Add new prompt before Question A13: *“For A13, have participant lift pannus up to measure the hip circumference.”*
5. Add new Questions A13, A13a: *“HIP, w/out pannus.”* This measurement will be recorded for all participants. Those with a pannus should lift it up to have the measurement performed.
6. Question A13c: Clarify that measurements to compare are waist and hip without pannus.
