

F08 – visit 23
Version 10/01/05

1. Delete question A1 and prompt, visual examination of external genitalia. Sites can opt to continue this aspect of the examination; however, results will no longer be recorded on F08.
2. Add prompt after question A12 to skip to question A16 if exam is being performed at an odd-numbered visit. Bi-manual exam will now only be performed at even-numbered visits.
3. Delete rectal examination, questions A17 and A18.
4. On F08s1, abnormality/lesion charts, delete subquestions a. how many? b. size, and c. depth.
5. Delete following clinical impressions:
 - a. B1. Pregnancy
 - b. B2. Menopause
 - c. B4. Vaginitis (candidal, trichomonal, bacterial vaginosis)
 - d. B5. Cervicitis (gc/non-gc)
 - e. B6. PID
 - f. B7. Proctitis (gc/non-gc, herpetic)
 - g. B9. Molluscum
 - h. B10. Syphilis (chancre, rash/secondary)
 - i. B13. Other vaginal abnormality
 - j. B14. Uterine enlargement
 - k. B15. Other anal abnormality
 - l. B16. Other vulvar abnormality
 - m. B17. Adnexal mass (not PID)
 - n. B18. Adnexal tenderness (not PID or mass)
