

New Recruit Baseline History (F20)
Version 04/01/13

1. Add new Question C11: “lung cancer.” A “yes” response to this question will generate an ATC record for disease code 113.
2. Delete old Question C20c: “Lupus or rheumatoid arthritis or any rheumatologic disease.”
3. Question D15: Add “or Adiana” to types of permanent sterilization procedures.
4. Add new Question E0: “In your lifetime, how many years have you lived in a household with at least one cigarette smoker other than yourself where the person smoked in the house? Please think about **all** households in which you have ever lived.” For visit 37, this question was asked on the F24BEH form. It has been moved to F20 so it continues to be asked of all new recruits.
5. Question E15: Change question to “Have you ever sniffed, snorted or smoked cocaine?”
6. Question E15a: Change question to “On average, how often have you sniffed, snorted or smoked cocaine?”
