

WIHS F23: Obstetric, Gynecological & Contraception History
Version: 04/01/09

The purpose of the F23 is to track the participant's pregnancies, gynecological history, and methods of birth control. Changes to this form include:

1. Add new Question C0, "*Since your (MONTH) study visit, have you used any form of birth control at all, either to prevent pregnancy, to avoid getting or giving STDs, or to regulate your periods?*"
2. Replace prompt at start of Section C ("If participant had tubal ligation (B3a = 1) or hysterectomy (B6 = 1) prior to her (month) study visit, then skip to C8.") with two questions to facilitate skip pattern:
 - C0a: "*Has participant ever had a tubal ligation (i.e., Question B3a = 1)?*"
 - C0b: "*Has participant had a hysterectomy prior to her last study visit (i.e., Question B6 = 1)?*"
2. Delete "*breast or*" from Question F3.
3. Delete "*or lumps*" and "*or breasts*" from Question F4.
