

F29 – Visit 20 Changes
Version 4/1/04

1. Re-ordered standard blood draw according to November 2003 WIHS EC meeting.
2. Added a note to not collect the gray-top for glucose if the participant is not fasting. Also shaded this tube in gray.
3. Modified footnote notations.
4. Corrected Whole Blood Volume estimates.
5. Added tube volume in the Tube Type column.
6. Increased tube volume and expected collection volume to 10ml and 8.5 ml respectively for the B4. Metabolic panel serum tube (formerly B10. Insulin/Lipids Repository).
7. Added Section A. Participant's Fasting Status. Date/time of blood draw will be recorded in this section.
8. Added a reminder to complete a second F29a if a second blood draw visit is necessary.
