

F29 – visit 24
Version 04/01/06a

1. Question C4: (TC, HDL-C, TRIG, LDL-C, insulin) specimen will be collected at odd visits, regardless of the participant's fasting status. If a participant misses an odd visit, collect the specimen at her next even visit, plus her next odd visit to get the participant back on an odd-visit schedule. See examples below.
2. Delete question C4d: Tube for Novel CVD assay will no longer be collected.
3. Delete question C12: Tube for Hemoglobin A1c assay will no longer be collected.
4. Delete question C12d: Tube for NMR Lipoprotein assay will no longer be collected.
5. Question C13: Glucose specimen will be collected at odd visits, only if the participant is fasting. If participant misses an odd visit, collect the specimen at her next even visit, plus her next odd visit to get the participant back on an odd-visit schedule. See examples below.
6. C4 and C13: If a participant is enrolled in the CVD substudy and is non-fasting at her core visit at which lipid/glucose specimens are to be collected, please request that she return for a separate fasting visit so that lipid and glucose specimens can be collected. Complete for CV29 to record information about specimens collected at a separate fasting visit. Non-fasting women who are not enrolled in the CVD substudy do not need to return for a separate fasting visit for lipid/glucose collection.

EXAMPLES FOR QUESTIONS C4 AND C13:

- Participant missed visit 23. Collect **C4** (TC, HDL-C, TRIG, LDL-C, Insulin) and **C13** (glucose) specimens at visit 24 and again at visit 25. Record collection on F29.
- Participant attended visit 23. Collect **C4** (TC, HDL-C, TRIG, LDL-C, Insulin) and **C13** (glucose) specimens at visit 25. Record collection on F29.
- Participant is not fasting at visit 25 core visit and *is not* enrolled in CVD substudy. Collect **C4** (TC, HDL-C, LDL-C) at visit 25 core visit. Do not collect **C13** (glucose). Record collection on F29. Do not schedule separate fasting visit.
- Participant is not fasting at visit 25 core visit and *is* enrolled in CVD substudy. Collect **C4** (TC, HDL-C, LDL-C) at visit 25 core visit. Do not collect **C13** (glucose) at visit 25 core visit. Record core visit collection on F29. Schedule separate fasting visit for collection of lipid (TC, HDL-C, TRIG, LDL-C, Insulin) and glucose specimens. Record separate fasting visit collection on CV29.
