

MS01 – Visit 20 Changes
Version 4/2/04

1. If response to question A3 is “YES,” end form instead of proceeding to question A4.
2. Delete questions A4 a – m.
3. Delete question A5.
4. Renumber questions subsequent to A5.
5. Added a new PI to the medication list in question A4a. 249 Lexiva (fosamprenavir).
6. Question A4a: Change from asking for ART medications taken “today” to asking for ART medications taken “in the past 3 days.”
7. Question A5: Add “date last taken” for recording last use of ART medications. Since we’re now asking about ART use in 3 days prior to OGTT, rather than only day of OGTT, we need to record the actual date each medication was last taken instead of just the time last taken.
