

**Functional Performance Tests (PBM)**  
**Version 10/01/15**

1. Add new Question A0: "For what study is this form being completed?" If response is "MSK Substudy" (1), then entire form will be completed. If response is "Frailty Study" (2), then only Sections C, D, E and G will be completed. Skip pattern will be programmed into Apollo.
2. Question E1: Change skip pattern for response options 5, 6 and specify, so that interviewer is directed to Prompt after Question E3 for these responses.
3. Add Prompt after Question E3 to indicate next question based on study in which participant is taking part. If participant is completing form as part of the Frailty Study, skip to Question G1. If participant is completing form as part of the MSK Substudy, proceed to Section F (400-meter walk).
