       INTRODUCTION 1:
       This section of the questionnaire asks about how you are currently taking (DRUG). Most people with HIV have many pills to take at different times during the day. Many people find it hard to always remember their pills. I need to understand how people with HIV are really doing with their medication doses. Please tell me what you are actually doing. Don't worry about telling me that you don't take all your doses. I need to know what is really happening, not what you think I want to hear.

       INTRODUCTION 2:
       Now I'm going to ask you about how you are currently taking (DRUG).
