

PRNOTI – visit 22
Version 04/01/05

1. Revise instructions at top of page to include eligibility criteria for study:
“Participants are eligible for enrollment if the response to question B9a, B10a or B11a on form F23 is ‘live birth’ or ‘stillbirth.’”
2. Delete old question A5: “Method used to determine pregnancy protocol eligibility.” Only women who have delivered a live birth or stillbirth since their last study visit are eligible for enrollment.
3. Add new question A5: “Enrollment disposition.” Response categories include: 1) “eligible and enrolled,” 2) “eligible, but declined participation,” and 3) “eligible, but not enrolled for other reason.” If response is #3, reason not enrolled will be specified.
4. Delete question A7: “Does participant consent to additional third trimester WIHS pregnancy visit?” These visits were discontinued beginning with visit 21.
5. Add question A9a through A9f. These questions will collect information on providers and institutions used for prenatal care and delivery to aid in abstraction. Questions will not be entered into Apollo.
 - a. Prenatal care provider(s)
 - b. Prenatal care institution(s)
 - c. Dates received prenatal care
 - d. Labor/delivery provider
 - e. Labor/delivery institution
 - f. Date of labor/delivery
6. Add prompt: “Data entry staff: Do not enter question A9 into Apollo; this information is collected only to aid in abstraction. If question A5=1, give copy of completed PRNOTI form and medical record release to abstractionist/OB designee. Abstractionist/OB designee: If question A5 = 1, complete forms PR01 and PR02 via review of medical records.”
