A4.   DATE OF INTERVIEW: |___|___|/|___|___|/|___|___|
                                              M   D   Y

A5.   INTERVIEWER'S INITIALS: |___|___|___|

A6.   TIME MODULE BEGAN |___|___|:|___|___| AM 1
                                                                PM 2

PROMPT: COMPLETE FORM ONLY FOR HIV-NEGATIVE WOMEN ENROLLED IN 2001/02 (visits 15/16), 2011/12 (visits 33-37), OR DURING VISIT 39.

A7.   The next few questions are about tuberculosis or TB. To see if a person has TB a doctor or nurse will give a blood or a skin test – sometimes called a PPD test. If the skin test shows the person has been exposed to or infected with TB, more tests are done to see if they are sick from the TB. A person might get an X-ray or be asked to cough into a machine. If they are sick, then we say they have "tuberculosis disease." Sometimes this is called "active" or "infectious tuberculosis." Usually, if a person has tuberculosis disease, people who lived or worked with the person will be tested for tuberculosis too.

   a.   Have you ever had a positive blood or skin test for TB, sometimes called a PPD?

        YES... 1
        NO .... 2 **(b)**

        i.   When was your last positive test (month/year)? |___|___| / |___|___|
                                                                              M   Y

   b.   Have you ever been told you had tuberculosis disease?

        YES... 1
        NO .... 2 **(A8)**

        i.   Where were you told the TB was? Was it in your lungs or some other location?

             LUNGS... 1
             OTHER LOCATION 2
             UNKNOWN 3

PROMPT: IF PARTICIPANT RESPONDS "YES" TO EITHER A7a or A7b, COMPLETE AN ATC FOR EACH REPORTED ILLNESS.

A8.   TIME MODULE ENDED |___|___|:|___|___| AM 1
                                                                PM 2
