3

Average eGFR: 45.85 mL/min|1.73 m²

For male children 11 years old with IFCC-calibrated systatin C 1.7 mg/L, median estimated GFR is 69.1 with interquartile range from 42.6 to 5.6 mL/min[1.73 m². This means that 50% of children with this profile have GFR greater than 69.1 mL/min[1.73 m². 25% of children with this profile have GFR less than 42.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile have GFR greater than 56.6 mL/min[1.73 m² and 25% of children with this profile ha
