ANTIVIRAL MEDICATION ADHERENCE FORM

Most people with HIV have many pills to take at different times during the day.

Many people find it hard to always remember their pills.

MARKING INSTRUCTIONS

- · Some people get busy and forget to carry their pills with them.
- Some people find it hard to take their pills according to all the instructions, such as "take with meals" or "take every 8 hours".
- Some people decide to skip, reduce or stop doses to avoid side effects.

We need to understand how people with HIV are really doing with their medication doses.
