

2020-2026

STUDY WIDE SUBSTUDIES

Data on many key intensive measurements are now available for thousands of participants

**Substudies with ongoing enrollment*

2,984

Echocardiogram*

Ultrasound of the heart to assess cardiac structure & function

3,361

Mental Health & Substance Use

Disorder assessment using the Composite International Diagnostic Interview (CIDI)

3,132

Microbiome*

Gut microbiome measured in stool samples

3,751

Pulmonary Function

Spirometry, diffusion capacity & pulmonary symptom assessments

4,301

Neurocognitive Function (brief)*

Brief (7–10-minute) neurocognitive assessment using BRACE

3,626

Neurocognitive Function (full)*

In-depth (60-75-minute) neurocognitive assessment using BRACE+

3,343

Tooth Count*

Photographs of the oral cavity

3,727

Hearing & Balance

Hearing and balance survey & auditory testing

4,449

Fibroscan*

Ultrasound of the liver to assess liver stiffness
