PROMPT: IF THIS IS THE FIRST DRUG FORM 1 YOU ARE COMPLETING FOR THIS PARTICIPANT AT THIS VISIT, READ INTRODUCTION 1. OTHERWISE, READ INTRODUCTION 2.

INTRODUCTION 1: This section of the questionnaire asks about how you have taken (DRUG) in the past three days. Most people with HIV have many pills to take at different times during the day. Many people find it hard to always remember their pills. I need to understand how people with HIV are really doing with their medication doses. Please tell me what you are **actually** doing. Don't worry about telling me that you don't take all your doses. I need to know what is really happening, not what you think I want to hear.

INTRODUCTION 2: Now I'm going to ask you about how you have taken (DRUG) in the past three days.

7. Please indicate on the response card the point showing your best guess about how much (DRUG) you have taken in the **past 3 days**.

10. When was the last time you missed a dose of (DRUG)?

SHOW PARTICIPANT RESPONSE CARD E5. CIRCLE ONE ANSWER.

Table with two columns of time intervals and corresponding numbers from 1 to 7.

11. The following question asks about the timing of your doses of (DRUG). We will use the words “correct time” for a dose. We would like to know how many doses of (DRUG) you took within 2 hours of the correct time in the last month. That is, how many did you take 2 hours or less (early or late) away from the correct time?

PROBE: What do we mean by “correct time?” If you are taking (DRUG) three times per day, the “correct time” to take it would be exactly every 8 hours.

Please indicate on the response card the point showing your best guess about how often you took (DRUG) within 2 hours of the correct time in the **past month**.
