10/02/05b – form version
10/02/05a – QxQs version

1. Instructions for form completion were modified to ask if the participant has taken the drug *in the past three days*. A prompt was added to define use “in the past three days” for the participant: “Medications you have taken *in the past three days* include any you have taken at least one time today, yesterday, or the day before yesterday.”
2. Question B1a: Changed wording from current use of medication to *use in past three days*.
3. Prompt after question B3: changed wording from current use of medication to *use in past three days*.
4. A new tablet formulation of Kaletra is now available. A new response option for column d. Formulation of Drug was added to the form to account for this change. The new response option is: 40. Tablet form (200 mg lopinavir/50 mg ritonavir).
