

Blood Specimen Collection Form (F29)
Version 10/01/13a

1. Footnote to Questions C6, C15, C16, C17: Revise to indicate that baseline visits for MSK substudy will occur during visits 35-40, and follow-up visits during visits 39-44.
2. Switch order of Questions C3 (serum for repository) and C4 (lipids/insulin testing), so that lipid/insulin specimen is collected before serum for repository. This will make collection order on form consistent with Section 10 of the MOO.
