

Baseline Neuropathy Assessment (NP01)
Version 04/01/2014

1. Question C1: Change instructions to indicate that *“Rydel-Seiffer 64/128 Hz tuning fork”* should now be used. Response categories for C1a and C1b were changed accordingly. In addition, *“Normal Reference Values for Lower Extremities”* were added after Question C1.
2. Add *“Instructions for evaluating knee deep tendon reflexes”* before Question C2.
3. Add Questions C2a and C2b in which to record knee deep tendon reflexes.
4. Add Question C3: *“Are both the right and left knee reflexes normal, increased, or clonus...?”*
5. Add *“Instructions for evaluating knee deep tendon reflexes using the Jendrassik Maneuver”* before Question C4.
6. Add Questions C4a and C4b in which to record knee deep tendon reflexes using the Jendrassik Maneuver.
7. Renumber subsequent questions.
